Phycology/Spiritual

Real Magic

Magic is a spell you can start using "spelling." Our language is made to create feelings in one another and feelings create emotions (which are said to be the "energies in motion.") This means feelings/emotions are what "drive" us to act. All life is energy interacting with energy. Some people start with affirmations to begin changing their worlds –others, find affirmations are not enough to combat their degraded thoughts/beliefs. The key to effective affirmations, is in directing the energy related to them. This comes through dissecting our habits and questioning our reality. Are you ready for the challenge to awaken your true potential?

Hali Sarah Parsons

Hali Sarah Parsons is a multi-talented young lady expressing herself through a variety of arts including areas in entertainment, writing, fashion and other mediums. She has always challenged traditional limits. As reported by her mother, in grammar school Hali was the individual who would be zig-zagging when the teacher instructed a single-file line. Through her life experiences, she adopted conformation and asserts herself in valued areas. Her mission is to spread awareness through her expressions and share her talent and views with the world.

In this book, Hali gives readers techniques (to play active rolls in their development) and insight (to gain awareness in the process of reality.) "It's time to, "wake up." Create your world, not someone else's and learn to understand and respect your *own* boundaries," reports Hali.
