The Tropical North Philosophy

The Tropical North Haligric Guide is designed for the two great seasons of Australia's top end — the Wet (approximately October through April) and the Dry (May through September). Unlike the four-season model of southern Australia, the Tropics cycle between monsoon abundance and clear, dry vitality. This guide provides the metabolic framework to move with those cycles rather than against them: cooling, hydrating foods during the intense humidity of the Wet; grounding, warming foods during the clear, cooler Dry.

The Calendar Decoder

Schedules are organized by date groups (e.g., **1/8/15/22**). These represent the **Day of the Week** (e.g., every Monday). **Logic:** By repeating the same Tetralty each Monday for a month, you establish a consistent rhythm that allows your body to align with the Tropical North's unique seasonal shifts at a cellular level.

The Tetralty Formula

Every day is a Tetralty: **One Grain + One Green + One Protein + One Digestive Seal**. This four-fold structure mirrors the four pillars of Haligricity — Thinking, Feeling, Doing and Being — ensuring cellular satiety, elemental balance and metabolic equilibrium without digestive fatigue.. In the Tropical North, we emphasize cooling, light grains like jasmine rice and sago, hydrating greens including water spinach and bok choy, and clean proteins such as tempeh and legumes to navigate the heat and humidity without burdening digestion.

The Seal is a small digestive finisher taken after lunch and dinner. It completes the six Vedic tastes and needs no cooking: a warm Digestive Brew (cumin, coriander, fennel, ginger and lemon) in the damp and spring months, a cooling brew or fresh fruit in peak heat, a Spiced Orchard Anchor of gently stewed fruit in late summer and autumn, and a Mineral Jing Truffle (a date filled with tahini or nuts) in deep winter. No refined sugar — sweetness comes only from fruit, dates and warm spices.

The Haligric Yearly Meal Guide

Volume 1: Dry Season · May: The Clear Dry Opening

*The early Dry Season in the Tropical North is characterised by low humidity, clear skies, and cooling nights. To align your **Haligricity** here, we focus on grounding the body after the Wet Season's heat and hydration. We shift toward warming grains and mineral-rich vegetables from the local dry-season harvest. The **Liver** and **Lungs** are supported to clear accumulated Wet Season dampness.*

The Tetralty: Brown Rice (Grain) + Kangkong/Water Morning Glory (Green) + Tempeh (Protein) + CCF Brew (Cumin, Coriander & Fennel) (Seal)

1. Cook Brown Rice. 2. Slice tempeh into strips; marinate in coconut aminos and turmeric for 5 minutes. 3. In a wok over high heat, stir-fry tempeh until golden. 4. This is **Wood Phase** at its most settled: the body has shed the Wet Season's dampness and can now build strength. We lean on hearty dry-season greens, sweet potato and pumpkin from the market gardens, and grounding legumes to store energy for the heat ahead.*

Snake beans thrive in the Dry Season gardens of Darwin and strengthen the Spleen while the body builds reserves.

1. Cook Millet. 2. Cube sweet potato; toss with coconut oil and cumin and roast at 200C for 25 minutes. 3. Simmer red lentils with garlic, ginger and turmeric until soft. 4. The Haligric Yearly Meal Guide

Volume 1: Dry Season · July: The Dry Plateau

*The Dry Plateau is the calm before the climb. Days stay clear but begin to warm, and the land starts to dry out completely. This is a transition month: we keep the grounding foods of the Dry but begin to introduce lighter, cooling greens so the body is not caught off guard when the Build-Up arrives. The **Spleen** and Stomach are supported to keep digestion steady through the change.*

2. Zucchini & Black-Eye Pea Wild Rice Bowl

The Tetralty: Wild Rice (Grain) + Zucchini (Green) + Black-Eye Peas (Protein) + Fennel & Mint Brew (Seal)

Volume 1: Dry Season · August: The Build-Up Begins

*The Build-Up is the most energetically intense period of the Tropical North year — temperatures climb, humidity rises, thunderstorms develop. This is **Fire Phase**: the body needs cooling, hydrating foods to prevent the heat from penetrating too deeply. We emphasize bitter greens to clear **Heart** heat and light grains that do not add to internal fire.*

We focus on cooling, moistening foods — bitter greens, cucumber, melon and mung beans — and keep grains light so they never add to internal heat. Hydration with every meal is the priority this month.*

1. Watercress & White Bean Cooling Bowl

The Tetralty: Millet (Grain) + Watercress (Green) + White Beans (Protein) + Fennel & Mint Cooler (Seal)

1. Cook Millet and let it cool slightly. 2. Wash a large bunch of watercress; leave it fresh and uncooked. 3. Warm white beans with garlic, lemon juice and a pinch of salt. 4. Watercress is one of the most cooling greens available and clears Heart heat during the Late Dry.

2. Cucumber & Mint Quinoa Salad with Chickpeas

The Tetralty: Quinoa (Grain) + Cucumber & Mint (Green) + Chickpeas (Protein) + Coriander-Seed Cooler (Seal)

1. Cook Quinoa and spread it out to cool. 2. Dice two Lebanese cucumbers and chop a handful of mint. 3. Rinse chickpeas and toss with lime juice and a pinch of cumin. 4. Volume 1: Dry Season · October: The Pre-Monsoon Surge

This is late **Fire Phase**: heat is now joined by dampness, which weighs on the **Spleen**. We keep meals cooling but add gentle drying foods like adzuki beans and barley-style grains, and keep everything light, fresh and easy to digest.*

Regional Tetralty Recipes (Tropical North October)

1. Kangkong & Adzuki Bean Damp-Clearing Bowl

The Tetralty: Jasmine Rice (Grain) + Kangkong (Green) + Adzuki Beans (Protein) + Fennel & Mint Cooler (Seal)

1. Cook Jasmine Rice. 2. Simmer pre-soaked adzuki beans with a slice of ginger until tender (about 40 minutes). 3. Stir-fry kangkong with garlic over high heat for 60 seconds. 4. Season beans with coconut aminos and a squeeze of lime. 5. Serve beans and kangkong over rice. Adzuki beans gently drain the dampness that builds as humidity climbs before the monsoon.

2. Adzuki Bean & Pumpkin Stew over Millet

The Tetralty: Millet (Grain) + Pumpkin (Green/Vegetable) + Adzuki Beans (Protein) + Coriander-Seed Cooler (Seal)

1. Cook Millet. 2. Sauté onion, garlic and ginger in coconut oil. 3. Add cubed pumpkin, cooked adzuki beans, a pinch of turmeric and enough water to cover. 4. Simmer 20 minutes until the pumpkin is soft and the stew thickens. 5. Serve over millet with fresh coriander. Pumpkin steadies the Spleen while adzuki beans keep the stew light — a comforting anchor for the pre-monsoon weeks.

1. Ginger Rice Congee — The Monsoon Anchor

The Tetralty: Brown Rice (Grain) + Kangkong (Green) + Red Lentil Dahl (Protein) + CCF Brew (Cumin, Coriander & Fennel) (Seal)

1. Simmer 1 cup brown rice in 5 cups water with a thumb of fresh ginger and 2 garlic cloves until it becomes a thick congee (approximately 45 minutes). 2. Prepare a simple red lentil dahl: cook red lentils with turmeric, cumin, and coconut milk until soft. 3. Blanch kangkong in boiling water for 30 seconds. 4. Serve congee topped with kangkong, dahl, and fresh coriander. Congee is the most Spleen-protective food available during the Wet Season's dampness.

2. Mushroom & Millet Wet Season Bowl

The Tetralty: Millet (Grain) + Shiitake Mushroom (Green/Fungus) + Mung Beans (Protein) + Fennel & Mint Brew (Seal)

1. Cook Millet. 2. Soak and slice dried shiitake mushrooms; stir-fry with garlic, ginger, and a splash of coconut aminos. 3. Warm pre-cooked mung beans with a pinch of cumin. 4. We support the Lungs with white and pungent foods — white beans, ginger, garlic and Chinese cabbage — alongside warm grains that keep the Wet Season's dampness in check.*

*The Return to Dry brings blue skies, falling humidity and the first cool mornings in months. This is **Early Wood**: energy begins to rise and move outward again after the long inward pull of the Wet. We support the **Liver** with fresh greens and light, upward-moving grains, while keeping a few warming foods on the table to carry the body smoothly into the new Dry Season.*

Regional Tetralty Recipes (Tropical North April)

1. Kangkong & Chickpea Rising Qi Bowl

The Tetralty: Brown Rice (Grain) + Kangkong (Green) + Chickpeas (Protein) + CCF Brew (Cumin, Coriander & Fennel) (Seal)

1. Cook Brown Rice. 2. Warm chickpeas with garlic, ginger and a pinch of turmeric. 3. Add a bunch of kangkong and toss over high heat for 60 seconds. 4. Season with lime juice and coconut aminos. 5. Serve over rice with fresh Thai basil. Fresh greens move Liver Qi upward as the Dry returns and energy begins to rise.

2. Green Lentil & Greens Stew over Sorghum

The Tetralty: Sorghum (Grain) + Kangkong & Bok Choy (Green) + Lentils (Protein) + Fennel & Mint Brew (Seal)

1. Cook Sorghum. 2. Simmer lentils with onion, garlic, ginger and cumin until tender (about 25 minutes). 3. Stir in chopped kangkong and bok choy for the final 3 minutes. 4. Season with lemon juice and black pepper. 5. Serve over sorghum. A light, green stew that bridges the last of the Wet and the first clear days of the Dry.
