The California Philosophy

The California Haligric Guide is designed for the diverse microclimates of the Pacific coast and the fertile valleys. As shifting global patterns influence the state's agriculture and temperature, this guide provides the metabolic adaptability required to navigate the cooling coastal fog and the drying inland heat.

The Calendar Decoder

Schedules are organized by date groups (e.g., **1/8/15/22**). These represent the **Day of the Week** (e.g., every Monday).

Logic: By repeating the same Tetralty each Monday for a month, you establish a consistent rhythm that allows your body to align with California's unique seasonal shifts at a cellular level.

The Tetralty Formula

Every day is a Tetralty: **One Grain + One Green + One Protein + One Digestive Seal**. This four-fold structure mirrors the four pillars of Haligricity — Thinking, Feeling, Doing and Being — ensuring cellular satiety, elemental balance and metabolic equilibrium without digestive fatigue. In California, we emphasize hydrating, mineral-rich greens and versatile grains like Quinoa and Wild Rice to maintain balance through the state's long growing seasons.

The Seal is a small digestive finisher taken after lunch and dinner. It completes the six Vedic tastes and needs no cooking: a warm Digestive Brew (cumin, coriander, fennel, ginger and lemon) in the damp and spring months, a cooling brew or fresh fruit in peak heat, a Spiced Orchard Anchor of gently stewed fruit in late summer and autumn, and a Mineral Jing Truffle (a date filled with tahini or nuts) in deep winter. No refined sugar — sweetness comes only from fruit, dates and warm spices.
