THE HALIGRIC YEARLY MEAL GUIDE

Volume III: Temperate South Australia

Melbourne · Adelaide · Perth · Tasmania · Nourishing Through Four True Seasons

The Temperate South Philosophy

The Temperate South Haligric Guide is designed for the four distinct seasons of Australia's southern states — where Melbourne is famous for having four seasons in one day, Adelaide offers a Mediterranean climate of dry summers and wet winters, Perth combines Mediterranean warmth with Indian Ocean influence, and Tasmania experiences the coldest and wettest conditions in Australia. Despite this diversity, all four share the fundamental four-season structure that the Haligric Trinity system is built around: the Wood energy of spring, the Fire of summer, the Metal of autumn, and the Water depth of winter.

The Calendar Decoder

Schedules are organized by date groups (e.g., **1/8/15/22**). These represent the **Day of the Week** (e.g., every Monday). **Logic:** By repeating the same Trinity each Monday for a month, you establish a consistent rhythm that allows your body to align with the Temperate South's clear seasonal shifts at a cellular level.

The Trinity Formula

Every day is a Trinity: **One Grain + One Green + One Protein** . In the Temperate South, we emphasize the full range of four-season grains — light and sprouted in spring, cooling in summer, hearty in autumn, and warming in winter — alongside the extraordinary seasonal variety of temperate vegetables and the clean proteins that support each season's specific metabolic demands.

Volume 3: Spring Quarter · Month 1: The Spring Opening

*Temperate South Spring arrives dramatically after a true winter — longer days, warming soil, and the first flush of spring vegetables from the market gardens of the Yarra Valley, the Adelaide Hills, and the Swan Valley. To anchor your **Haligricity** here, we focus on the **Liver**'s spring upwelling using local asparagus, baby spinach, peas, and spring herbs. Light, upward-moving foods that reflect the season's Yang expansion.*

1. Cook Brown Rice. 2. Snap the woody ends from a bunch of local asparagus; cut into 3cm pieces. 3. In a pan, warm chickpeas with two cloves of garlic and a pinch of cumin. 4. Add asparagus to the pan; toss on high heat for 2-3 minutes until bright green and just tender. 5. Serve over brown rice; finish with lemon juice and a sprinkle of nutritional yeast. Asparagus is one of the first local vegetables to appear in the temperate south spring and its upward-moving energy matches the season perfectly.

2. Broccolini & White Bean Quinoa Bowl

The Trinity: Quinoa (Grain) + Steamed Broccolini (Green) + White Beans (Protein)

1. Cook Quinoa. 2. Steam broccolini for 3-4 minutes until bright and just tender. 3. Warm white beans in a pan with garlic, fresh thyme, and a squeeze of lemon. 4.
