THE HALIGRIC YEARLY MEAL GUIDE

Volume I: Tropical North Australia

Darwin · Cairns · Broome · Nourishing Through the Wet and the Dry

The Tropical North Philosophy

The Tropical North Haligric Guide is designed for the two great seasons of Australia's top end — the Wet (approximately October through April) and the Dry (May through September). Unlike the four-season model of southern Australia, the Tropics cycle between monsoon abundance and clear, dry vitality. This guide provides the metabolic framework to move with those cycles rather than against them: cooling, hydrating foods during the intense humidity of the Wet; grounding, warming foods during the clear, cooler Dry.

The Calendar Decoder

Schedules are organized by date groups (e.g., **1/8/15/22**). These represent the **Day of the Week** (e.g., every Monday). **Logic:** By repeating the same Trinity each Monday for a month, you establish a consistent rhythm that allows your body to align with the Tropical North's unique seasonal shifts at a cellular level.

The Trinity Formula

Every day is a Trinity: **One Grain + One Green + One Protein** . In the Tropical North, we emphasize cooling, light grains like jasmine rice and sago, hydrating greens including water spinach and bok choy, and clean proteins such as tempeh and legumes to navigate the heat and humidity without burdening digestion.

The Haligric Yearly Meal Guide

Volume 1: Dry Season · Month 1: The Clear Dry Opening

*The early Dry Season in the Tropical North is characterised by low humidity, clear skies, and cooling nights. To align your **Haligricity** here, we focus on grounding the body after the Wet Season's heat and hydration. We shift toward warming grains and mineral-rich vegetables from the local dry-season harvest. The **Liver** and **Lungs** are supported to clear accumulated Wet Season dampness.*

Regional Trinity Recipes (Tropical North Month 1)

1. Kangkong & Tempeh Stir Bowl

The Trinity: Brown Rice (Grain) + Kangkong/Water Morning Glory (Green) + Tempeh (Protein)

1. Cook Brown Rice. 2. Slice tempeh into strips; marinate in coconut aminos and turmeric for 5 minutes. 3. In a wok over high heat, stir-fry tempeh until golden. 4. 2. Pumpkin & Red Lentil Dry Season Bowl

The Trinity: Millet (Grain) + Roasted Pumpkin (Green/Vegetable) + Red Lentils (Protein)

1. Cook Millet. 2. Cube and roast pumpkin with cumin and a touch of coconut oil until caramelised. 3. Simmer red lentils with garlic, ginger, and a pinch of turmeric until soft. 4. Volume 1: Dry Season · Month 2: The Peak Dry

*The Peak Dry brings the Tropical North its most comfortable weather — warm sunny days, cool nights and almost no humidity. This is **Wood Phase** at its most settled: the body has shed the Wet Season's dampness and can now build strength. We lean on hearty dry-season greens, sweet potato and pumpkin from the market gardens, and grounding legumes to store energy for the heat ahead.*

The Haligric Yearly Meal Guide

Volume 1: Dry Season · Month 3: The Dry Plateau

*The Dry Plateau is the calm before the climb. Days stay clear but begin to warm, and the land starts to dry out completely. This is a transition month: we keep the grounding foods of the Dry but begin to introduce lighter, cooling greens so the body is not caught off guard when the Build-Up arrives. The **Spleen** and Stomach are supported to keep digestion steady through the change.*

The 28-Day Trinity Schedule (Dry Weeks 9–12)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Warm Brown Rice w/ Coconut & Banana	Jasmine Rice, Bok Choy, Mung Beans	Millet, Pumpkin, Red Lentils
2/9/16/23	Rolled Oats w/ Papaya & Lime	Sorghum, Kangkong, Chickpeas	Quinoa, Snake Beans, Tempeh

2. Zucchini & Black-Eye Pea Wild Rice Bowl

The Trinity: Wild Rice (Grain) + Zucchini (Green) + Black-Eye Peas (Protein)

1. Cook Wild Rice. 2. Slice zucchini into half-moons and sauté with garlic for 3 minutes. 3. Warm black-eye peas with cumin and a pinch of smoked paprika. 4. Combine with wild rice. 5. The Haligric Yearly Meal Guide

Volume 1: Dry Season · Month 4: The Build-Up Begins

*The Build-Up is the most energetically intense period of the Tropical North year — temperatures climb, humidity rises, thunderstorms develop. This is **Fire Phase**: the body needs cooling, hydrating foods to prevent the heat from penetrating too deeply. We emphasize bitter greens to clear **Heart** heat and light grains that do not add to internal fire.*

The 28-Day Trinity Schedule (Build-Up Weeks 13–16)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Cooling Rice Congee w/ Cucumber & Mint	Jasmine Rice, Bitter Melon, Mung Beans	Wild Rice, Watercress, White Beans
2/9/16/23	Oat Porridge w/ Banana & Coconut Milk	Brown Rice, Bok Choy, Tempeh	Millet, Water Spinach, Chickpeas

Warm pre-cooked mung beans with ginger and coconut aminos. 5. Serve over rice. Bitter melon is the most potent cooling food available in the Tropical North and clears Heart heat during the Build-Up.

2. Mango & Amaranth Sunrise Bowl

The Trinity: Amaranth (Grain) + Fresh Mango (Green/Fruit) + Chia Seeds (Protein supplement)

1. Cook Amaranth until soft; allow to cool slightly. 2. Dice ripe mango; squeeze fresh lime over it. 3. Layer amaranth with mango and a tablespoon of chia seeds. 4. Top with fresh mint and a drizzle of coconut milk. Cooling, hydrating, and light — suited to the Build-Up's rising heat.

The Haligric Yearly Meal Guide

Volume 1: Dry Season · Month 5: The Late Dry Intensity

*The Late Dry Intensity pushes the heat higher while the air stays dry and dusty. This is full **Fire Phase**: the **Heart** works hard and the body loses fluids quickly. We focus on cooling, moistening foods — bitter greens, cucumber, melon and mung beans — and keep grains light so they never add to internal heat. Hydration with every meal is the priority this month.*

The 28-Day Trinity Schedule (Build-Up Weeks 17–20)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Cooling Oat Bowl w/ Watermelon & Mint	Jasmine Rice, Bitter Melon, Mung Beans	Millet, Watercress, White Beans
2/9/16/23	Chilled Amaranth w/ Mango & Lime	Brown Rice, Bok Choy, Tempeh	Quinoa, Cucumber & Mint Salad, Chickpeas

Regional Trinity Recipes (Tropical North Month 5)

1. Watercress & White Bean Cooling Bowl

The Trinity: Millet (Grain) + Watercress (Green) + White Beans (Protein)

1. Cook Millet and let it cool slightly. 2. Wash a large bunch of watercress; leave it fresh and uncooked. 3. Warm white beans with garlic, lemon juice and a pinch of salt. 4. Combine millet and beans, then fold through the watercress so it just wilts. 5. Finish with olive oil and fresh mint. Watercress is one of the most cooling greens available and clears Heart heat during the Late Dry.

2. Cucumber & Mint Quinoa Salad with Chickpeas

The Trinity: Quinoa (Grain) + Cucumber & Mint (Green) + Chickpeas (Protein)

1. Cook Quinoa and spread it out to cool. 2. Dice two Lebanese cucumbers and chop a handful of mint. 3. Rinse chickpeas and toss with lime juice and a pinch of cumin. 4. Combine everything with a drizzle of olive oil. 5. Serve cool, never chilled straight from the fridge. Cucumber hydrates and cools — the perfect counterweight to the dry intensity of the season.

The Haligric Yearly Meal Guide

Volume 1: Dry Season · Month 6: The Pre-Monsoon Surge

*The Pre-Monsoon Surge is the heaviest stretch of the year — building cloud, rising humidity and short, sharp storms that bring little relief. This is late **Fire Phase**: heat is now joined by dampness, which weighs on the **Spleen**. We keep meals cooling but add gentle drying foods like adzuki beans and barley-style grains, and keep everything light, fresh and easy to digest.*

The 28-Day Trinity Schedule (Build-Up Weeks 21–24)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Rice Congee w/ Ginger & Spring Onion	Jasmine Rice, Kangkong, Adzuki Beans	Millet, Bok Choy, Mung Beans
2/9/16/23	Oat Porridge w/ Papaya & Lime	Brown Rice, Bitter Melon, Chickpeas	Wild Rice, Watercress, White Beans

6/13/20/27	Cooling Oat Bowl w/ Cucumber & Mint	Wild Rice, Chinese Cabbage, Kidney Beans	Sorghum, Water Spinach, Tempeh
7/14/21/28	Warm Quinoa w/ Banana & Coconut	Jasmine Rice, Kangkong, Chickpeas	Adzuki Bean & Pumpkin Stew over Millet

Regional Trinity Recipes (Tropical North Month 6)

1. Kangkong & Adzuki Bean Damp-Clearing Bowl

The Trinity: Jasmine Rice (Grain) + Kangkong (Green) + Adzuki Beans (Protein)

1. Cook Jasmine Rice. 2. Simmer pre-soaked adzuki beans with a slice of ginger until tender (about 40 minutes). 3. Stir-fry kangkong with garlic over high heat for 60 seconds. 4. Season beans with coconut aminos and a squeeze of lime. 5. Serve beans and kangkong over rice. Adzuki beans gently drain the dampness that builds as humidity climbs before the monsoon.

2. Adzuki Bean & Pumpkin Stew over Millet

The Trinity: Millet (Grain) + Pumpkin (Green/Vegetable) + Adzuki Beans (Protein)

1. Cook Millet. 2. Sauté onion, garlic and ginger in coconut oil. 3. Add cubed pumpkin, cooked adzuki beans, a pinch of turmeric and enough water to cover. 4. Simmer 20 minutes until the pumpkin is soft and the stew thickens. 5. Serve over millet with fresh coriander. Pumpkin steadies the Spleen while adzuki beans keep the stew light — a comforting anchor for the pre-monsoon weeks.

The Trinity: Brown Rice (Grain) + Kangkong (Green) + Red Lentil Dahl (Protein)

1. Simmer 1 cup brown rice in 5 cups water with a thumb of fresh ginger and 2 garlic cloves until it becomes a thick congee (approximately 45 minutes). 2. Prepare a simple red lentil dahl: cook red lentils with turmeric, cumin, and coconut milk until soft. 3. Blanch kangkong in boiling water for 30 seconds. 4. Serve congee topped with kangkong, dahl, and fresh coriander. Congee is the most Spleen-protective food available during the Wet Season's dampness.

2. Mushroom & Millet Wet Season Bowl

The Trinity: Millet (Grain) + Shiitake Mushroom (Green/Fungus) + Mung Beans (Protein)

1. Cook Millet. 2. Soak and slice dried shiitake mushrooms; stir-fry with garlic, ginger, and a splash of coconut aminos. 3. Warm pre-cooked mung beans with a pinch of cumin. 4. Assemble and top with sesame seeds and scallion. Shiitake mushrooms tonify the immune system during the Wet Season's damp challenge.

Volume 1: Wet Season · Month 8: The Full Monsoon

*The Full Monsoon brings sustained rain, flooded creeks and air that never quite dries out. This is deep **Water Phase** in the Tropics: dampness is everywhere, and the **Spleen** and **Kidney** carry the load. We favour warm, cooked meals — congees, stews and stir-fries — with drying spices like ginger and cumin, and avoid cold or raw foods that add to internal damp.*

The Haligric Yearly Meal Guide

Volume 1: Wet Season · Month 9: The Wet Peak

The Wet Peak is the hottest, wettest stretch of the monsoon — tropical lows, steamy afternoons and heavy overnight rain. This transition month asks the body to manage heat and dampness at the same time. We balance cooling greens with warm cooked grains and drying legumes, keeping portions moderate and meals simple so digestion stays strong.

The 28-Day Trinity Schedule (Wet Season Weeks 33–36)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Rice Congee w/ Ginger & Coriander	Jasmine Rice, Kangkong, Mung Beans	Millet, Bok Choy, Adzuki Beans
2/9/16/23	Warm Oats w/ Banana & Coconut	Brown Rice, Water Spinach, Tempeh	Wild Rice, Pumpkin, Red Lentils
3/10/17/24	Savory Millet w/ Shiitake & Sesame	Sorghum, Bitter Melon, Chickpeas	Quinoa, Chinese Broccoli, Black Beans
4/11/18/25	Teff Porridge w/ Papaya & Lime	Jasmine Rice, Bok Choy, White Beans	Brown Rice, Kangkong, Mung Beans

Add chickpeas and a splash of coconut aminos; toss until heated through. 5. Serve over sorghum with fresh coriander. Bitter melon clears heat while warm sorghum keeps the Spleen steady against the damp.

2. Mung Bean & Ginger Soup over Millet

The Trinity: Millet (Grain) + Bok Choy (Green) + Mung Beans (Protein)

1. Cook Millet. 2. Simmer mung beans with plenty of fresh ginger, garlic and water until soft and soupy (about 35 minutes). 3. Add halved bok choy for the last 3 minutes. 4. The Haligric Yearly Meal Guide

Volume 1: Wet Season · Month 10: The Monsoon Holds

*The Monsoon Holds as the rains settle into a steadier rhythm and the heat begins, ever so slightly, to soften. This is **Metal Phase** in the Tropics: the **Lungs** are vulnerable to the constant moisture, and the body begins to look inward. We support the Lungs with white and pungent foods — white beans, ginger, garlic and Chinese cabbage — alongside warm grains that keep the Wet Season's dampness in check.*

The 28-Day Trinity Schedule (Wet Season Weeks 37–40)

Day	Warm Rising (Breakfast)	Mid-Day Trinity (Lunch)	Evening Trinity (Dinner)
1/8/15/22	Warm Brown Rice Congee w/ Ginger & Garlic	Brown Rice, Chinese Cabbage, White Beans	Millet, Pumpkin, Red Lentils
2/9/16/23	Warm Oats w/ Pear & Cinnamon	Wild Rice, Bok Choy, Chickpeas	Quinoa, Kangkong, Tempeh
3/10/17/24	Savory Millet w/ Sesame & Spring Onion	Sorghum, Chinese Broccoli, Adzuki Beans	Brown Rice, Daikon & Greens, White Beans
4/11/18/25	Teff Porridge w/ Coconut & Ginger	Millet, Water Spinach, Black Beans	Wild Rice, Chinese Cabbage, Mung Beans
5/12/19/26	Warm Amaranth w/ Banana & Almonds	Brown Rice, Kangkong, Kidney Beans	Buckwheat, Bok Choy, Chickpeas
6/13/20/27	Rice Congee w/ Shiitake & Pepper	Quinoa, Chinese Cabbage, Tempeh	Millet, Pumpkin, Black-Eye Peas
7/14/21/28	Warm Quinoa w/ Papaya & Sesame	Wild Rice, Chinese Broccoli, Red Lentils	White Bean & Daikon Soup over Brown Rice

Regional Trinity Recipes (Tropical North Month 10)

1. Chinese Cabbage & White Bean Lung Bowl

The Trinity: Brown Rice (Grain) + Chinese Cabbage (Green) + White Beans (Protein)

1. Cook Brown Rice. 2. Shred Chinese cabbage and sauté with plenty of garlic and ginger for 4 minutes. 3. Warm white beans with white pepper and a splash of vegetable stock. 4. Combine cabbage and beans over rice. 5. Finish with toasted sesame and spring onion. White and pungent foods nourish the Lungs, which are most challenged by the monsoon's lingering moisture.

2. White Bean & Daikon Soup over Brown Rice

The Trinity: Brown Rice (Grain) + Daikon & Greens (Green/Vegetable) + White Beans (Protein)

1. Cook Brown Rice. 2. Simmer sliced daikon with ginger, garlic and vegetable stock for 15 minutes. 3. Add white beans and a handful of bok choy leaves; simmer 5 minutes more. 4. Season with white pepper and coconut aminos. 5. Ladle over rice. Daikon moves stuck dampness and supports the Lungs — a light, clarifying soup for the holding rains.
