THE HALIGRIC YEARLY MEAL GUIDE

Regional Tetralty Alignment

Volume I: Texas & The Gulf Coast

Bioregional Support for the Humid Spring to the Mild Winter

The Southern Philosophy

The Southern Haligric Guide is specifically calibrated for the Gulf Coast and the Texas plains. As global climate shifts, maintaining biological harmony with your immediate environment becomes a priority. This guide provides the metabolic stability needed to navigate intense solar heat and returning coastal dampness.

The Calendar Decoder

The schedules are grouped by numbers (e.g., **1/8/15/22**). These represent the **Day of the Week** (e.g., every Monday).

Batch Tetralty Prep: By repeating the same Tetralty each Monday, you simplify your kitchen rhythm and allow your body to adjust to the season on a cellular level through consistency.

The Tetralty Formula

Every day is a Tetralty: **One Grain + One Green + One Protein + One Digestive Seal**. This four-fold structure mirrors the four pillars of Haligricity — Thinking, Feeling, Doing and Being — ensuring cellular satiety, elemental balance and metabolic equilibrium without digestive fatigue. This formula ensures blood sugar stability and provides the specific elemental properties needed to drain dampness or cool the blood as the Texas temperatures rise.

The Seal is a small digestive finisher taken after lunch and dinner. It completes the six Vedic tastes and needs no cooking: a warm Digestive Brew (cumin, coriander, fennel, ginger and lemon) in the damp and spring months, a cooling brew or fresh fruit in peak heat, a Spiced Orchard Anchor of gently stewed fruit in late summer and autumn, and a Mineral Jing Truffle (a date filled with tahini or nuts) in deep winter. No refined sugar — sweetness comes only from fruit, dates and warm spices.
