# THE HALIGRIC YEARLY MEAL GUIDE

*Regional Trinity Alignment*

---

Volume II: New England & The Northeast

Bioregional Fortification for the Frozen Thaw to the Coastal Autumn & Nor'easter Deep Winter

# The New England Philosophy

The New England Haligric Guide is calibrated for Northern Atlantic soils, maritime chill, short intense summers, and deep interior cold. As seasonal climate shifts accelerate, maintaining internal biological balance with your immediate bioregional landscape becomes paramount. This guide delivers the cellular resilience and metabolic grounding required to insulate against Nor'easters, navigate persistent spring dampness, and flourish through the northern seasons.

### The Calendar Decoder

Schedules are organized by recurring date sequences (e.g., **1/8/15/22** ). These represent the **Day of the Week** (e.g., every Monday of that 28-day cycle).

**Batch Trinity Prep:** Repetition is the anchor of cellular alignment. By preparing and repeating the same Trinity each Monday throughout the month, you remove kitchen friction and allow your digestive fire to sync effortlessly with the regional climate shifts.

## The Trinity Formula

Every meal conforms to the Haligric Trinity: **One Grain + One Green/Vegetable + One Protein** . In New England, we prioritize warming grains like Buckwheat, Spelt, and Rye during the long freeze, mineral-rich Atlantic sea greens (dulse and kelp), sweet storage roots, and 100% clean, soy-free plant proteins to protect your kidney Jing and steady blood viscosity year-round.

## The Haligric Integration: Grounding the Northern Circle

In the New England bioregion, longevity and vitality depend on rhythmic consistency against drastic seasonal swings. When winter howling winds rattle your window frames, nourish the Kidney root with black beans, buckwheat, and dulse. When the short, brilliant summer arrives, celebrate with native sweet corn, blueberries, and summer squash without abandoning the Warm Rising morning anchor. By holding true to the One Grain + One Green + One Protein Trinity, your internal fire remains steady through every gale and thaw.
